

## ***BELCANDO® grain-free line with three new products***

A growing percentage of dog owners is concerned about grains in dog food and possible intolerances. Therefore German manufacturer BEWITAL petfood complements its successful BELCANDO® grain-free line with three new products:

**JUNIOR GRAIN-FREE** uses well-tolerated and energy-rich amaranth instead of grain. Other selected raw materials like low-ash poultry meat meal and chia seeds, rich in omega-3 fatty acids and prebiotics, provide balanced proportions of energy and minerals. JUNIOR GRAIN-FREE is intended for raising sensible young dogs from four months of age.

**ADULT GRAIN-FREE OCEAN** contains fish as single animal protein source. This variety is especially suitable for dogs with sensitivity to grain and to protein of land animals. The added krill is a particularly high-quality source of omega-3 fatty acids and antioxidants.

The smaller croquettes of **FINEST GRAIN-FREE SALMON** with krill and salmon are especially well-liked by small, finicky dogs. Valuable salmon oil with omega-3 fatty acids promotes healthy skin and fur.

At Interzoo 2014 BEWITAL petfood will also launch its new range of BELCANDO® tabs – five varieties of tasty supplements. They specifically improve the supply of certain nutrients and vitamins to dogs with special problems or older dogs:

- **BELCANDO® AGIL** with freeze-dried green-lipped mussels supports the joint metabolism
- **BELCANDO® FIBER** is especially rich in fiber and recommended for overweight dogs
- **BELCANDO® DERM** with Biotin promotes healthy skin and fur
- **BELCANDO® AGE** contains nutrients known for their positive effect on age-related problems
- **BELCANDO® IMMUN** supports the dogs' natural immune defense system

The new BELCANDO tabs and the new Grain-free varieties will be available in selected specialty pet stores from July on.
