

BELCANDO introduces new grain-free formulas

With three new types of dry food, BELCANDO® is adding to its range for sensitive dogs and those affected by food allergies:

Adult Grain-Free is recommended as a complete food for dogs with normal activity levels who have a sensitivity to grain. Its unique formula contains valuable amaranth – one of man's oldest agricultural crops, naturally gluten-free and well-tolerated. **Finest Grain-Free** is the grain-free alternative for small and medium-sized breeds of dogs. The small croquettes come with a special sauce. If you mix the food with warm water it produces a tasty coating of sauce, which is a particular delicacy for finicky dogs.

BELCANDO® Mix It is a grain-free supplement for raw and chilled meat which provides important nutrients with sea zooplankton and amaranth. The innovative MIX IT contains nutrients and ballast in a balanced way as tasty croquettes that are easy to use. When combined with Mix It dry food, the new **BELCANDO® Single Protein** wet food produces a balanced ration. The use of just one kind of meat (chicken, beef, horse or kangaroo) is ideal for dogs with a delicate digestion or food allergies.

About BEWITAL petfood: Premium pet food for every budget in German food quality – that is the standard that we set ourselves. You will find our brands BELCANDO®, LEONARDO®, BEWI CAT® and BEWI DOG® exclusively in pet shops. We don't take part in price wars at discount store level but we focus on selected prime quality raw materials and we do without artificial colourings, flavourings and preservatives.
