

## Customers highly interested in BELCANDO® grain-free alternatives

### BEWITAL petfood presents new grain-free varieties at Milano's Dog Show

The new BELCANDO® grain-free dog food varieties from German manufacturer BEWITAL petfood were met with a very encouraging response at the Milano dog show 2013. Export manager Berthold Lütke Meyring and the Italian wholesale team introduced the novelties to many interested visitors during the three days of the fair. BELCANDO® Adult Grain-Free is recommended as a complete food for dogs with normal activity levels who have a sensitivity to grain. Finest Grain-Free is the grain-free alternative for small and medium-sized breeds of dogs. Both formulas contain valuable amaranth – one of man's oldest agricultural crops, naturally gluten-free and well-tolerated.

The Milano Dog Show was one of numerous international trade shows BEWITAL petfood will be attending in 2013. The manufacturer's export team will e.g. also be present at the EURO DOG Show in Geneva and the WORLD DOG SHOW in Hungary.
